Place:	Höllgrotten Show Cave

Description

Höllgrotten Show Cave and Cave Lighting Project invite you to a specialized seminar 'Information day for show cave operators' in Baar (Switzerland).

Topics and goals

Between December 2011 and March 2012 a joint project (Höllgrotten Show Cave and Cave Lighting Project) was carried out to completely renovate this tourist attraction in Baar.

Participants in the renovation project in Höllgrotten Cave present to you the complete transformation carried out in and around the cave.

You can experience:

- the Cave Lighting™ LED lighting system,
- the Cave Lighting™ control system,
- the DMX music light show,
- the illumination control system and power supply throughout the whole network (similar to "smart home" technology)
- and much more.

You will discover how the conceptual approach to the renovation and also the use of innovative technology and modern marketing methods increase the number of enthusiastic visitors and thus boost takings.

We shall be very happy to meet you in March 2013!

Visit one of the most modern show caves in Europe!

If you intend to take part in the event, please register:

[On-line Registration](http://goo.gl/YutPz) {http://goo.gl/YutPz}

or Call +49 (0) 2772 575218.
